To Prevent Moths-When Cleaning a Musty Teapot-Bran Water for Washing Varnished Paint-Newest Novelties in Autumn Suits-White Broadcloth Skating Suit -Recipes for Peach Catsup and Potato Creole.

PREVENTS MOTHS.

One of the serious problems confronting the housewife each spring, is how to store furs and woolens so as to keep them free from moths while

Outside of cold storage most of the following is the simplest, effective and economical plan:

First, take each fur or woolen garment, beat it well with a light wooden rod, shake out thoroughly and brush carefully; then hang on a line for several hours exposed to the sun and

After the sun bath, shake and brush again.

Next, secure suitable pasteboard lay the garments neatly folded. Then seal up the box carefully by gumming a strip of wrapping paper around the edges so as to leave no cracks,

Tobacco, camphor or cedar chips may be scattered over and between the garments, but these are simply repellants and are of no value if the moth eggs are allowed to remain in

If the preliminary work of beating, shaking, brushing and exposing to the sun and air and the packing be carefully done, there need be no fear of damage from moths while the garments are stored.

To Clean Teapots-To prevent your teapot becoming musty, drop a piece of sugar into it after drying, and close the lid. The sugar will absorb all moisture and the teapot remain fresh and sweet even after months of

wash varnished paint with bran wa ter, made by boiling a couple of handfuls of bran in about one-half a galon of water and strain and use about half in a bucket of water. It will look as though fresh varnished. Very ielicate shades of paint look like new f wiped with a wrung-out linen cloth which sprinkle finely powdered bath brick. Varnished paper should be washed down with warm water to which is added a little paraffin. Nothing else is required to give it the nec-

MANY NOVELTIES

IN AUTUMN SUITS Every day now fashion designs become more established. The question of a winter suit is holding the minds of the feminine multitudes, and what best and suitable must soon be set-

A suit of French blue kitten's ear cloth has the short jacket smocked around the entire waistline in a wide band, with a narrow shirred ruffle heading turned upward, the part of the coat being slightly bloused. The front of the coat is bound with gray fur with gray embroidery, consisting of horizontal lines, each ending with a square at each side from the neck to a point a little below the breastline. sleeves are trimmed with smocking around the wrist, ending with a flar

ing ruffle.

A white broadcloth skating suit is especially interesting for its simplic-The hip length jacket hangs straight with perhaps the merest in- Carter Wellford dication of a nip at the waistline, and ginia boxes such as tailors use, and in these is buttoned down the front with poly- in early gonal buttons.

> PEACH CATSUP. One quart of peach pulp.

One pound loaf sugar. One teaspoon broken mace and hole pepper.

Two teaspoons cinnamon One-half teaspoon of cloves. Vinegar.

Steam the peaches whole and boil until reduced one-third. To each quart of fruit allow one pound of loaf sugar, but do not add until the juice has been boiled down one-third. Place in little bags (loosely) one teaspoon each of broken mace and whole pep per, two of cinnamon and a half teaspoon of cloves. Put these on to boil with the juice vinegar, with which the pulp and juice (after coking down) must be thinned, removing be fore the fruit and sugar are added.

POTATO CREOLE. Slice cold boiled potatoes very thin Into a deep frying pan put one cup onions, sliced finely, fry until slightly brown. Add the potatoes and one-half cup of green peppers, cut in small pieces. Fry until a golden brown, season with salt and pepper Try fresh corn as a sub stitute for the potatoes.

Nothing like it is known in the west deepest working running 18 per cent molybdenite, which, with an 80 per cent concentration, will give \$2500 a

The Girl of the Music Hall," at the Rex tonight. REDUCTION OF

Butte, Mont., Sept. 24.-The genral public has little conception of he scope and far-reaching experiments in the wet reduction of complex zinc

ores being conducted in the Washoe laboratories of the Anaconda Copper company. The progress of the experi-ments and testing work is such that from sources presumably close to Anaconda metallurgical circles comes the prediction that the Anaconda company is on the eve of revolutionizing the reduction of zinc ores. The smelting of these ores at the present time is one of the costliest, both from the standpoint of actual reductions and from the initial cost of the erection of reduction works. tion of reduction works.

tion of reduction works.

Aside from practically sounding the doom of zinc smelting plants, it is predicted that the process evolved at the Washoe works also will revolutionize the mining end of the zinc industry, making available the profitable mining of zinc ores that today practically are worthless. These ores more particularly are confined to the zinc ores carrying quantities of iron

ROUND MOUNTAIN CO.

MAKES RICH STRIKE Owing to the lateness in the spring when the pipe line was completed, the hydraulicking season of the Round Mountain Mining company was rather limited, the Tonopah Bonanza reports. Work with the monitors ceased on September 1 on account of shortage of water and now it is used only on the day shift for cleaning up the bedrock sweepings, while the other two shifts are employed cutting races for

next season's run. The clean-up for August was practically the same as July, \$10,000 net, while the mine netted about \$4000. Superintendent Ernest looks for the coming year to prove a very profitable one. The gravel handled this year yielded an average of \$2 a yard. The hydraulicking will be r esumed next March and it is expected that 1500

yards a day will be handled. A big development has taken place in the mine which probably explains the recent stock activity. A crosscut has been run on the 700 level into the footwall of the Los Gazabo vein and five feet is breaking close to \$50 s ton. A drift is being run to determine the entent of the lens.

WALLACE-HARRIS. Wednesday in the Salt Lake temple Miss Martha Wallace, daughter of Mr. and Mrs. Joseph Wallace, 593 Twenty-seventh street, and Lawrence E. Harris were married.

Thursday they returned to Ogden and were tendered a wedding supper at the home of the bride's parents, Thursday evening, only members of the immediate families being present. Mr. and Mrs. Harris will make their home in Benson Utah

They will make their home in this city where Mr. Sheffield is in the employ of the Brigham City Fruit Growers association.

Monday afternoon of this week Mrs. M. A. Poulson entertained in honor

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly falling to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by Fl J. Chency & Co., Toledo, Obio, is the only Constitutional cure on the market. It is taken internally in doses from 10 drops to a tesspoonful. It sets directly on the blood and mocous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: P. J. CHENEY & CO., Toledo, Ohlo.
